Table of Contents

1. User Guide	21
1.1. All Users	21
1.1.1. Your AkaunID	21
1.1.2. The Production, Staging and Development Environment	21
1.1.3. Understanding Root vs Tenant	21
1.1.4. The Applet Store	22
1.2. Project Implementors	23
1.2.1. Subscription setup in Akaun Platform	23
1.2.2. Tenant setup in Akaun Platform	23
1.2.3. Applet-Catalogs	23
1.2.4. Configuration of Core Modules	24
1.3. Tenant Owners	25
1.3.1. What is a Tenant ?	25
1.3.2. Managing Users	25
1.3.3. Fees and Charges	25
1.3.4. Access and Permissions	25
1.3.5. System Performance	25
1.3.6. API	25
1.3.7. Subscriptions , Applet-Catalogs , Applets	25
1.3.8. Audit Trail	25
1.4. Applet Developers	26
1.4.1. Signing up your AkaunID	26
1.5. Reseller Guide	27
1.5.1. Section 1	27
1.5.2. Section 2	27
1.6. System Integrators	28
1.6.1. Section 1	28
1.6.2. Section 2	28
2. Guide by Industry	29
2.1. Consumer Electronics Industry	29
2.1.1. Problems	29
2.1.2. Solutions	29
2.1.3. Features	29
2.2. Pharmacy Industry	29
2.2.1. Problems	29
2.2.2. Solutions	29
2.2.3. Features	29
2.3. Car Workshops	29

2.3.1. Problems	29
2.3.2. Solutions	29
2.3.3. Features	29
2.4. Retail Chainstores	29
2.4.1. Problems	29
2.4.2. Solutions	29
2.4.3. Features	29
2.5. Logistics Industry	29
2.5.1. Problems	30
2.5.2. Solutions	30
2.5.3. Features	30
2.6. Manufacturing Industry	30
2.6.1. Problems	30
2.6.2. Solutions	30
2.6.3. Features	30
2.7. Pet Industry	30
2.7.1. Problems	30
2.7.2. Solutions	30
2.7.3. Features	30
3. Guide by Modules	31
3.1. Core Module	31
3.1.1. Introduction	31
Overview	31
Applets	31
Features and Functions	31
What's New	31
Getting Started	31
Module Dependencies	31
3.1.2. Module Name - Unique Value Proposition	31
3.1.3. Core Module - Related Applets	32
3.1.4. Module Name - Project Implementation Steps	32
Scope Management (End Results)	32
Project Gantt Chart	32
Project Kickstart Meeting	32
Weekly Meeting	32
Agile Method	32
Cashflow Projection	32
Human Resource Management	32
Communication Management	32
Risk Management	33
UAT (User Acceptance Test)	33

Requirement Analysis	33
Project Goes Live	33
Post Mortem	33
3.2. Accounting Module	33
3.2.1. Introduction	33
Overview	33
Applets	33
Features and Functions	33
What's New	33
Getting Started	33
Module Dependencies	33
3.2.2. Accounting - Unique Value Proposition	33
3.2.3. Accounting Module - Related Applets	33
3.2.4. Module Name - Project Implementation Steps	33
Scope Management (End Results)	33
Project Gantt Chart	34
Project Kickstart Meeting	34
Weekly Meeting	34
Agile Method	34
Cashflow Projection	34
Human Resource Management	34
Communication Management	34
Risk Management	34
UAT (User Acceptance Test)	34
Requirement Analysis	34
Project Goes Live	34
Post Mortem	34
3.3. Point of Sales Module	35
3.3.1. Introduction	35
Overview	35
Applets	35
Features and Functions	35
What's New	35
Getting Started	35
Module Dependencies	35
3.3.2. Point of Sales - Unique Value Proposition	35
3.3.3. Point of Sales Module - Related Applets	35
3.3.4. Point of Sales Module - Project Implementation Steps	35
Scope Management (End Results)	35
Project Gantt Chart	35
Project Kickstart Meeting	36

Weekly Meeting	36
Agile Method	36
Cashflow Projection	36
Human Resource Management	36
Communication Management	36
Risk Management	36
UAT (User Acceptance Test)	36
Requirement Analysis	36
Project Goes Live	36
Post Mortem	36
3.4. Manufacturing Module	36
3.4.1. Introduction	36
Overview	36
Applets	36
Features and Functions	36
What's New	37
Getting Started	37
Module Dependencies	37
3.4.2. Manufacturing - Unique Value Proposition	37
3.4.3. Manufacturing - Related Applets	37
3.4.4. Manufacturing - Project Implementation Steps	37
Scope Management (End Results)	37
Project Gantt Chart	37
Project Kickstart Meeting	37
Weekly Meeting	37
Agile Method	37
Cashflow Projection	37
Human Resource Management	37
Communication Management	38
Risk Management	38
UAT (User Acceptance Test)	38
Requirement Analysis	38
Project Goes Live	38
Post Mortem	38
3.5. Membership Module	38
3.5.1. Introduction	38
Overview	38
Applets	38
Features and Functions	38
What's New	38
Getting Started	38

Module Dependencies	38
3.5.2. Membership - Unique Value Proposition	38
3.5.3. Membership - Related Applets.....	38
3.5.4. Membership - Project Implementation Steps.....	38
Scope Management (End Results).....	38
Project Gantt Chart	39
Project Kickstart Meeting	39
Weekly Meeting.....	39
Agile Method	39
Cashflow Projection	39
Human Resource Management.....	39
Communication Management	39
Risk Management	39
UAT (User Acceptance Test)	39
Requirement Analysis	39
Project Goes Live.....	39
Post Mortem.....	39
3.6. Referral Module	40
3.6.1. Introduction	40
Overview.....	40
Applets.....	40
Features and Functions.....	40
What's New.....	40
Getting Started.....	40
Module Dependencies	40
3.6.2. Referral - Unique Value Proposition.....	40
3.6.3. Referral Module - Related Applets	40
3.6.4. Module Name - Project Implementation Steps	40
Scope Management (End Results).....	40
Project Gantt Chart	40
Project Kickstart Meeting	41
Weekly Meeting.....	41
Agile Method	41
Cashflow Projection	41
Human Resource Management.....	41
Communication Management	41
Risk Management	41
UAT (User Acceptance Test)	41
Requirement Analysis	41
Project Goes Live.....	41
Post Mortem.....	41

3.7. Customer Relationship Management	41
3.7.1. Introduction	41
Overview	41
Applets	41
Features and Functions	41
What's New	42
Getting Started	42
Module Dependencies	42
3.7.2. CRM - Unique Value Proposition	42
3.7.3. CRM - Related Applets	42
3.7.4. CRM - Project Implementation Steps	42
Scope Management (End Results)	42
Project Gantt Chart	42
Project Kickstart Meeting	42
Weekly Meeting	42
Agile Method	42
Cashflow Projection	42
Human Resource Management	42
Communication Management	43
Risk Management	43
UAT (User Acceptance Test)	43
Requirement Analysis	43
Project Goes Live	43
Post Mortem	43
3.8. Contact Center Module	43
3.8.1. Introduction	43
Overview	43
Applets	43
Features and Functions	43
What's New	43
Getting Started	43
Module Dependencies	43
3.8.2. Contact Center - Unique Value Proposition	43
3.8.3. Contact Center - Related Applets	43
3.8.4. Contact Center - Project Implementation Steps	43
Scope Management (End Results)	44
Project Gantt Chart	44
Project Kickstart Meeting	44
Weekly Meeting	44
Agile Method	44
Cashflow Projection	44

Human Resource Management	44
Communication Management	44
Risk Management	44
UAT (User Acceptance Test)	44
Requirement Analysis	44
Project Goes Live	45
Post Mortem	45
3.9. Name of Module	45
3.9.1. Introduction	45
Overview	45
Applets	45
Features and Functions	45
What's New	45
Getting Started	45
Module Dependencies	45
3.9.2. Digital Marketing - Unique Value Proposition	45
3.9.3. Digital Marketing - Related Applets	45
3.9.4. Digital Marketing - Project Implementation Steps	45
Scope Management (End Results)	45
Project Gantt Chart	45
Project Kickstart Meeting	46
Weekly Meeting	46
Agile Method	46
Cashflow Projection	46
Human Resource Management	46
Communication Management	46
Risk Management	46
UAT (User Acceptance Test)	46
Requirement Analysis	46
Project Goes Live	46
Post Mortem	46
3.10. Inventory Module	46
3.10.1. Introduction	46
Overview	46
Applets	46
Features and Functions	47
What's New	47
Getting Started	47
Module Dependencies	47
3.10.2. Inventory Module - Unique Value Proposition	47
3.10.3. Inventory Module - Related Applets	47

3.10.4. Inventory Module - Project Implementation Steps	47
Scope Management (End Results)	47
Project Gantt Chart	47
Project Kickstart Meeting	47
Weekly Meeting	47
Agile Method	47
Cashflow Projection	47
Human Resource Management	48
Communication Management	48
Risk Management	48
UAT (User Acceptance Test)	48
Requirement Analysis	48
Project Goes Live	48
Post Mortem	48
3.11. Marketplace Connector Module	48
3.11.1. Introduction	48
Overview	48
Applets	48
Features and Functions	48
What's New	48
Getting Started	48
Module Dependencies	48
3.11.2. Marketplace Connector - Unique Value Proposition	48
3.11.3. Marketplace Connector - Related Applets	48
3.11.4. Marketplace Connector - Project Implementation Steps	49
Scope Management (End Results)	49
Project Gantt Chart	49
Project Kickstart Meeting	49
Weekly Meeting	49
Agile Method	49
Cashflow Projection	49
Human Resource Management	49
Communication Management	49
Risk Management	49
UAT (User Acceptance Test)	49
Requirement Analysis	50
Project Goes Live	50
Post Mortem	50
3.12. Delivery Fulfillment Module	50
3.12.1. Introduction	50
Overview	50

Applets	50
Features and Functions	50
What's New	50
Getting Started	50
Module Dependencies	50
3.12.2. Delivery Fulfillment - Unique Value Proposition	50
3.12.3. Delivery Fulfillment - Related Applets	50
3.12.4. Delivery Fulfillment - Project Implementation Steps	50
Scope Management (End Results)	50
Project Gantt Chart	50
Project Kickstart Meeting	51
Weekly Meeting	51
Agile Method	51
Cashflow Projection	51
Human Resource Management	51
Communication Management	51
Risk Management	51
UAT (User Acceptance Test)	51
Requirement Analysis	51
Project Goes Live	51
Post Mortem	51
3.13. CP Commerce Module	51
3.13.1. Introduction	51
Overview	51
Applets	52
Features and Functions	52
What's New	52
Getting Started	52
Module Dependencies	52
3.13.2. CP Commerce - Unique Value Proposition	52
3.13.3. CP Commerce - Related Applets	52
3.13.4. CP Commerce - Project Implementation Steps	52
Scope Management (End Results)	52
Project Gantt Chart	52
Project Kickstart Meeting	52
Weekly Meeting	52
Agile Method	52
Cashflow Projection	53
Human Resource Management	53
Communication Management	53
Risk Management	53

UAT (User Acceptance Test)	53
Requirement Analysis	53
Project Goes Live	53
Post Mortem	53
3.14. Procure to Pay Module	53
3.14.1. Introduction	53
Overview	53
Applets	53
Features and Functions	53
What's New	53
Getting Started	53
Module Dependencies	53
3.14.2. Procure To Pay - Unique Value Proposition	53
3.14.3. Procure To Pay - Related Applets	53
3.14.4. Procure To Pay - Project Implementation Steps	54
Scope Management (End Results)	54
Project Gantt Chart	54
Project Kickstart Meeting	54
Weekly Meeting	54
Agile Method	54
Cashflow Projection	54
Human Resource Management	54
Communication Management	54
Risk Management	54

5. Cloud Native Architecture	88
5.1. Background	88
5.2. Motivation	88
5.2.1. Integrations	88
5.2.2. Infrastructure and Toolchain	88
5.2.3. Network Effect	88
5.2.4. Cloud Cost Savings	89
5.2.5. Artificial Intelligence	89
5.2.6. Human Resource	89
5.3. Journey	89
5.4. Challenges and Lessons	89

5.5. Technical Considerations	89
6. Technical Guide	90
6.1. Applet Development Guide	90
6.1.1. Creating a new Applet	90
Preparation Before Developing A New Applet.....	90
Business Requirements	90
Database Design	90
Mock Up and Design.....	90
API Design.....	90
6.1.2. Deploying applet to s3	90
6.1.3. Developer SysAdmin Applet.....	90
6.1.4. Example Applet Template.....	90
6.1.5. Inactive Applet.....	90
6.1.6. Publishing an Applet	90
6.1.7. Releasing new version of the applets.....	91
Handling changes in permission templates	91
Getting approval	91
6.1.8. Full Deletion of Applet.....	91
Removal of applet from Applet-Catalogs.....	91
Removal of applet from users who have installed the applet	91
Removal of the Javascript Bundle from s3	91
Delete all applet settings / configurations in bl_applet_* tables in both Tenant and Root ...	91
Removal of all schedulers related to this applet	91
Removal of Audit Trails and other applet related tables.....	91
Removal of applet from the Applet Master List - Google Spreadsheet.....	91
Removal.....	91
6.1.9. Quality Control Checklist	91
UI Design QC.....	91
Documentation QC	91
Permissions QC	91
Features QC.....	91
Development / Staging Environment QC	91
Commercials QC	92
Source Code QC	92
6.1.10. Support and Maintenance of Applet	92
6.1.11. Suspension of Applet	92
6.1.12. Types of Applet	92
6.1.13. UI Design Guidelines	92
6.1.14. Vendor Account.....	92
Vendor Registration	92
Developer Registration	92

Linking to the AkaunHQ Entity Account	92
6.1.15. Pricing for applets	92
6.1.16. Scheduler for applet.	92
6.1.17. Webhooks for Applets	92
6.1.18. Archiving an Applet	93
6.1.19. Client Side Settings	93
6.2. Akaun Shell Development Guide	93
6.3. Cloud Infrastructure	93
6.4. BigLedger Database Guide	93
6.4.1. Overview	93
6.4.2. Database Schema	93
6.4.3. Liquibase	93
6.4.4. The Root Database Schema	93
6.4.5. The Tenant Database Schema	93
6.5. BigLedger Java API Guide	93
6.5.1. Spring Framework	93
6.5.2. RESTful API Best Practices	93
6.6. Domain Driven Design	93
6.7. CP Commerce Development	93
6.8. Kubernetes	93
7. Documentation Authoring	94
7.1. Authoring this Documentation	94
7.2. Setup and Configurations	94
7.2.1. Github Repository	94
7.2.2. AsciiDoctor Toolchain	95
Installing AsciiDoctor	95
Installing Epub3 Converter	96
Installing PDF Converter	96
Installing Multipage HTML Converter	96
7.2.3. Visual Studio Code	96
7.3. Understanding the Directory Structure	96
7.4. Images	97
7.5. Committing Changes To The Repository	97
7.6. List of workshops	98
Glossary	99
Appendix A: First Appendix	100

Appendix B: Second Appendix	101
B.1. First Chapter	101
B.2. Second Chapter	101

Chapter 1. User Guide

This repository contains all the source code for publishing the Akaun Platform Public Documentation.

1.1. All Users

The very first thing that every akaun-platform users would need to have, is to sign up for and AkaunID. You can do so by visiting <https://akaun.com/>

1.1.1. Your AkaunID

It is important for you to understand that with a single AkaunID, it is possible for you to have multiple Sign-In methods. You could be using an email with password, a phone number with the same password, you could also be adding access keys to your AkaunID for integration purposes.

1.1.2. The Production, Staging and Development Environment

The very first thing to know is to understand the usage of each of the following environments.

Environment	URL	Custom Domain	Description
Production	https://akaun.com	<a href="https://<something>.akaun.net">https://<something>.akaun.net	This is the life environment, used by real businesses in their day to day operations.
Staging	https://akaun.cloud	<a href="https://<something>.akaun.app">https://<something>.akaun.app	This environment is usually used for testing by the customers and project managers. New features are tested by the end users here before it gets deployed to the production environment.
Development	https://akaun.dev	<a href="https://<something>.akaun.xyz">https://<something>.akaun.xyz	This environment is usually used by the software developers to do their experiments.

If you have registered an AkaunID to login to the Production environment, that doesn't mean you have the same AkaunID registered in the Staging Environment and vice versa.

1.1.3. Understanding Root vs Tenant

Within a single environment (Production vs Staging vs Development) there's one and only one root database, and there could be MANY tenant databases. Each user could be joining MULTIPLE tenants

and they could have different "RANK" when joining each tenant, for example, OWNER, ADMIN, MEMBER, GUEST, VISTOR.

Rank of a users in a Tenant	Description
OWNER	The OWNER of a tenant is able to add any applets to an "applet catalog" if the person is also the owner/admin of the "applet catalog". The OWNER is able to add, remove or promote another user in the tenant to be the OWNER of the tenant. This RANK is usually granted to the business owners or MIS Manager of a company.
ADMIN	The ADMIN of a tenant can do almost everything that the OWNER can do, except adding , removing or promoting another user in the tenant to become the OWNER. This role is usually granted to the MIS Executive or managers in a company.
MEMBER	The MEMBER Rank does not entitle a user to administer the Tenants , Applet Catalogs, they can however, become the OWNER/ADMIN or MEMBER of an Applet after they installed the specific applet. It is important to understand that the "OWNER/ADMIN of the Tenant" is NOT the same as the "OWNER/ADMIN" of the "Applet"

1.1.4. The Applet Store

By default, a newly signed up user would see the "Applet Store" (applet) upon successful login. From the **Applet Store** , a user would be able to install applets in the public or private applet-catalogs.

It is very important for users to take note that they are able to see "RANK" tag and "TENANT" tag before installing the applet, so that they are installing the right applet for themselves.

If you are NOT the OWNER / ADMIN of a tenant, you can see a list of applet-catalogs and multiple applets in each of the applet-catalog and choose to install any of the applets accordingly.

1.2. Project Implementors

Understanding of the Akaun Platform is a prerequisite for successful implementation of any projects using the BigLedger platform.

In this section, we are going to list down what the Platform System Administrators need to do, in order for a company to start using the Akaun-Platform.

1.2.1. Subscription setup in Akaun Platform

The Platform System Administrator should be using the "Platform SysAdmin Applet" to create a subscription, and then add the OWNER / ADMIN of the tenants (usually the MIS Manager or business owners) as a MEMBER of this subscription. By adding a user to this subscription, he/she will be able to create new Applet Catalogs using the "Tenant Admin Applet".

(At the time of writing as per 2022-05-19, the new "Platform SysAdmin Applet" and "Tenant Admin Applet" are being redeveloped, hence, we will use the work around method to achieve this for the time being.)

1.2.2. Tenant setup in Akaun Platform

Only the Akaun Platform system administrators (Wavelet and BigLedger employees) are able power up the tenant for you. The Platform System administrators need to ensure that when creating the Tenant, the correct subscription account is chosen.

Please email jira-mis@wavelet.net to request for the tenant to be created.

(We do not plan to allow non-System Administrators to create new tenants at the moment, because our Billing engine and FPX recurring payment authorization is not ready yet. Once these are ready, we may consider allowing businesses that have authorized us to bill and charge be able to create tenants in the "Tenant Admin Applet")

1.2.3. Applet-Catalogs

Think of applet-catalog as a collection of applets, tagged with RANK and TENANT. When the OWNER/ADMIN of the applet-catalogs can add applets to it, and they have to specify the "rank" and "tenant". This also mean, within the same applet-catalog, it is possible to include the same applet that links to different tenants.

The ADMIN/OWNER of the applet-catalog also need to add users to the applet-catalogs, and they can add them as OWNER/ADMIN/MEMBER to the applet-catalogs. Only OWNER/ADMIN of the catalogs can manage the applet-catalog (adding / removing applets and users from the applet-catalogs).

All OWNER/ADMIN/MEMBER of an applet-catalog can see the applets in this catalog and install these applets when they use the "Applet Store ⇒ Private"

When the users install applets from the "Applet Store" the RANK/TENANT tags will be applied to grant the users the respective permissions when they open the respective applet. Only the OWNER/ADMIN of the applets will be able to see and click on the "Settings" on the left handside

menu of the applets to perform some further configuration for the applet. (This is not the same as the rank of the users in the applet-catalog).

1.2.4. Configuration of Core Modules

The Core Module consist of the following the main applets that are depended by all other applets. For example, in order to issue a sales invoice, we need to ensure that the Company and Branches are setup and configured, the products and services are added into the Item Maintenance applet, the employees of the company is setup so that the users can select the salesman when issuing the sales invoice.

The applets in [Core Module](#) should be installed, configured in proper sequence, before you proceed to install the other applets.

See [Section 3.1, “Core Module”](#) for more details.

1.3. Tenant Owners

1.3.1. What is a Tenant ?

1.3.2. Managing Users

- You can invite / add a user to a tenant or remove their access to a tenant but you cannot reset their password
- Identity management is handled at the root or platform level

1.3.3. Fees and Charges

1.3.4. Access and Permissions

1.3.5. System Performance

1.3.6. API

1.3.7. Subscriptions , Applet-Catalogs , Applets

1.3.8. Audit Trail

1.4. Applet Developers

Guid for applet Developers

1.4.1. Signing up your AkaunID

2.7.2. Solutions

2.7.3. Features

Chapter 3. Guide by Modules

The Akaun platform is like lego blocks, users will be able to mix and match different applets to formulate a new module, even if it is not in the list below.

3.1. Core Module

3.1.1. Introduction

The intention of this section in the documentation. What this section cover, and not covering... and how it will link to other modules. Explaining that certain detail about

Overview

Some background of why this module was developed Provide a summary of what this module does and doesn't do.

Applets

The core module consists of the following applets:

- [Section 4.1.2, "Tax Configuration Applet"](#)
- [Section 4.1.3, "Organization Applet"](#)
- [Section 4.1.4, "Chart of Account Applet"](#)
- [Section 4.1.6, "Doc Item Maintenance Applet"](#)
- [Section 4.1.5, "Cashbook Applet"](#)
- [Section 4.1.7, "Inventory Item Maintenance Applet"](#)
- [Section 4.1.8, "Entity Maintenance Applet"](#)
- [Section 4.1.9, "Customer Maintenance Applet"](#)
- [Section 4.1.11, "Employee Maintenance Applet"](#)
- [Section 4.1.10, "Supplier Maintenance Applet"](#)

Features and Functions

Chapter 4. Applet Directory

4.1. Applet Listing

Applet Name	Description
Applet Store	This is the default applet that every user will get when they sign up to the Akaun Platform. Users can open this applet to install all other applets.
Organization Applet	You can use this applet to create / update / delete companies, branches and locations.

4.1.1. Applet Store

Introduction

This is the default applet that every user will get when they sign up to the Akaun Platform. Users can open this applet to install all other applets.

Modules

This applet is used in the following modules:

- [Section 3.1, “Core Module”](#)
- [Section 3.2, “Accounting Module”](#)
- [Section 3.3, “Point of Sales Module”](#)
- [Section 3.4, “Manufacturing Module”](#)
- [Section 3.5, “Membership Module”](#)
- [Section 3.6, “Referral Module”](#)
- [Section 3.7, “Customer Relationship Management”](#)
- [Section 3.8, “Contact Center Module”](#)
- [Section 3.9, “Name of Module”](#)
- [Section 3.10, “Inventory Module”](#)
- [Section 3.11, “Marketplace Connector Module”](#)
- [Section 3.12, “Delivery Fulfillment Module”](#)
- [Section 3.13, “CP Commerce Module”](#)
- [Section 3.14, “Procure to Pay Module”](#)
- [Section 3.15, “Order To Cash Module”](#)
- [Section 3.16, “Warehouse Management Module”](#)
- [Section 3.17, “Customer Data Platform”](#)
- [Section 3.19, “Digital Twin Module”](#)
- [Section 3.20, “Datalake Module”](#)

Roadmap

Chapter 5. Cloud Native Architecture

Common misunderstanding * thinking web based = cloud based. * everything has A.I. * online / networked = cloud based

Our aspirations * To be the business operating systems

5.1. Background

- Outdated JBoss application server, EJB 1.0 / 2.0
- Servers idling
- Hackers attack
- Certain minimum costs to power up a tenant
- Self service
- Internal employee users vs customers + suppliers
- Integration pains

5.2. Motivation

Platform Business Model

Multiple offerings → as middleware - backend as a service → as applets → as SAAS → as communication hub

Cross Platform development

Scalability

Flexibility

Growth

Composable Enterprise

Utility based billing

5.2.1. Integrations

spikes in loads

5.2.2. Infrastructure and Toolchain

Various tools ready to be used out of the box... example : OCR, Lambda, RDS, NoSQL, API Gateway

5.2.3. Network Effect

5.2.4. Cloud Cost Savings

5.2.5. Artificial Intelligence

5.2.6. Human Resource

5.3. Journey

5.4. Challenges and Lessons

5.5. Technical Considerations

- managing complexities
- Sharing about our journey to transform from monolith architecture to cloud native architecture
- Sharing about the problems and challenges implementing stateless applications
- Sharing about the implementation of Micro-Frontend Architecture
- Sharing about the implementation of Web Socket using API Gateway and DynamoDB
- Sharing about challenges of securing the API, permissions / configurations etc
- Sharing about the challenges of multi-tenant environments
- Sharing about the design of composable enterprise architecture
- Sharing about the tricky part of networked tenants

Chapter 6. Technical Guide

This technical guide is used by both internal and external employees of

6.1. Applet Development Guide

6.1.1. Creating a new Applet

There are many steps involved when you want to create a new applet, a well designed applet would have to follow our applet design guidelines.

Preparation Before Developing A New Applet

Business Requirements

Database Design

Mock Up and Design

API Design

6.1.2. Deploying applet to s3

- Making pull request the github vendor repository
- Platform SysAdmin to merge the changes from vendor repository to the global applet repository, and then syncing it to various branches : production, staging , development. Subsequently, these changes to be sync to the s3 bucket in AWS
- Submission for testing

6.1.3. Developer SysAdmin Applet

This applet is used by the Platform System Administrator to configure various applets

6.1.4. Example Applet Template

This guide provide a walk thru of the example applet so that the applet developers can cut short the learning time required to produce an applet from scratch.

6.1.5. Inactive Applet

An inactive applet is taken out from the applet store, but they are NOT deleted from the system yet.

The developer can still see this applet in their applet listing.

6.1.6. Publishing an Applet

- Logo design

- Applet Description
- Applet images (for Applet Store)
- Pricing Country
- Applet Type
- Quality Checking
- Security Checking *

6.1.7. Releasing new version of the applets

Handling changes in permission templates

Getting approval

6.1.8. Full Deletion of Applet

Removal of applet from Applet-Catalogs

Removal of applet from users who have installed the applet

Removal of the Javascript Bundle from s3

Delete all applet settings / configurations in bl_applet_* tables in both Tenant and Root

- This would include Permission Templates / Permission Sets etc.

Removal of all schedulers related to this applet

Removal of Audit Trails and other applet related tables

Removal of applet from the Applet Master List - Google Spreadsheet

Removal

6.1.9. Quality Control Checklist

In order to ensure the best user experience on the Akaun Platform, we need to ensure this checklist is executed on a periodic basis.

UI Design QC

Documentation QC

Permissions QC

Features QC

Development / Staging Environment QC

Commercials QC

Source Code QC

6.1.10. Support and Maintenance of Applet

6.1.11. Suspension of Applet

- Usually this happens when the developer / applet violates the policy of applet store etc.

6.1.12. Types of Applet

6.1.13. UI Design Guidelines

- Must have Applet settings at the bottom left
- Having Personal Settings at the bottom left
- Showing the Tenant-code at the top left
- Showing the applet logo at the top left
- Having left menu
- Responsive to both desktop and mobile

6.1.14. Vendor Account

Vendor Registration

Developer Registration

Linking to the AkaunHQ Entity Account

understanding of permission / assignee / target type table.

understanding of difference between permission set and permission template

requesting for the permission template to be created for third party developer..

6.1.15. Pricing for applets

For now, we go with simplified pricing strategy by just charging per user per applet per month manually before the Billing Engine is ready.

6.1.16. Scheduler for applet

The scheduler of an applet allow recurring task to be executed on a periodic basis.

6.1.17. Webhooks for Applets

The webhook for an applet is different from the webhook for Sales Order etc...

This webhook is specific to an applet, to cater for the following scenario... For example, when the users first installed an applet, or when they first start clicking on the applet... etc..

6.1.18. Archiving an Applet

Archiving an applet would be permanently in-activating an applet.

6.1.19. Client Side Settings

- This is used for certain client side permissions to hide certain fields in the UI
- Allowing users to configure customize the behavior of the client-side

6.2. Akaun Shell Development Guide

6.3. Cloud Infrastructure

6.4. BigLedger Database Guide

6.4.1. Overview

6.4.2. Database Schema

6.4.3. Liquibase

6.4.4. The Root Database Schema

6.4.5. The Tenant Database Schema

6.5. BigLedger Java API Guide

6.5.1. Spring Framework

6.5.2. RESTful API Best Practices

6.6. Domain Driven Design

6.7. CP Commerce Development

6.8. Kubernetes

Chapter 7. Documentation Authoring

7.1. Authoring this Documentation

This documentation is written using asciidoc, please take a few minutes to go through the following guide:

- <https://docs.asciidoctor.org/asciidoctor/latest/>
- <https://docs.asciidoctor.org/asciidoc/latest/>

Some useful videos:

- <https://www.youtube.com/watch?v=KbmpBZO4EoY>
- <https://www.youtube.com/watch?v=GL1SEYOhEiQ>
- https://www.youtube.com/watch?v=wca5m7JpS_U

7.2. Setup and Configurations

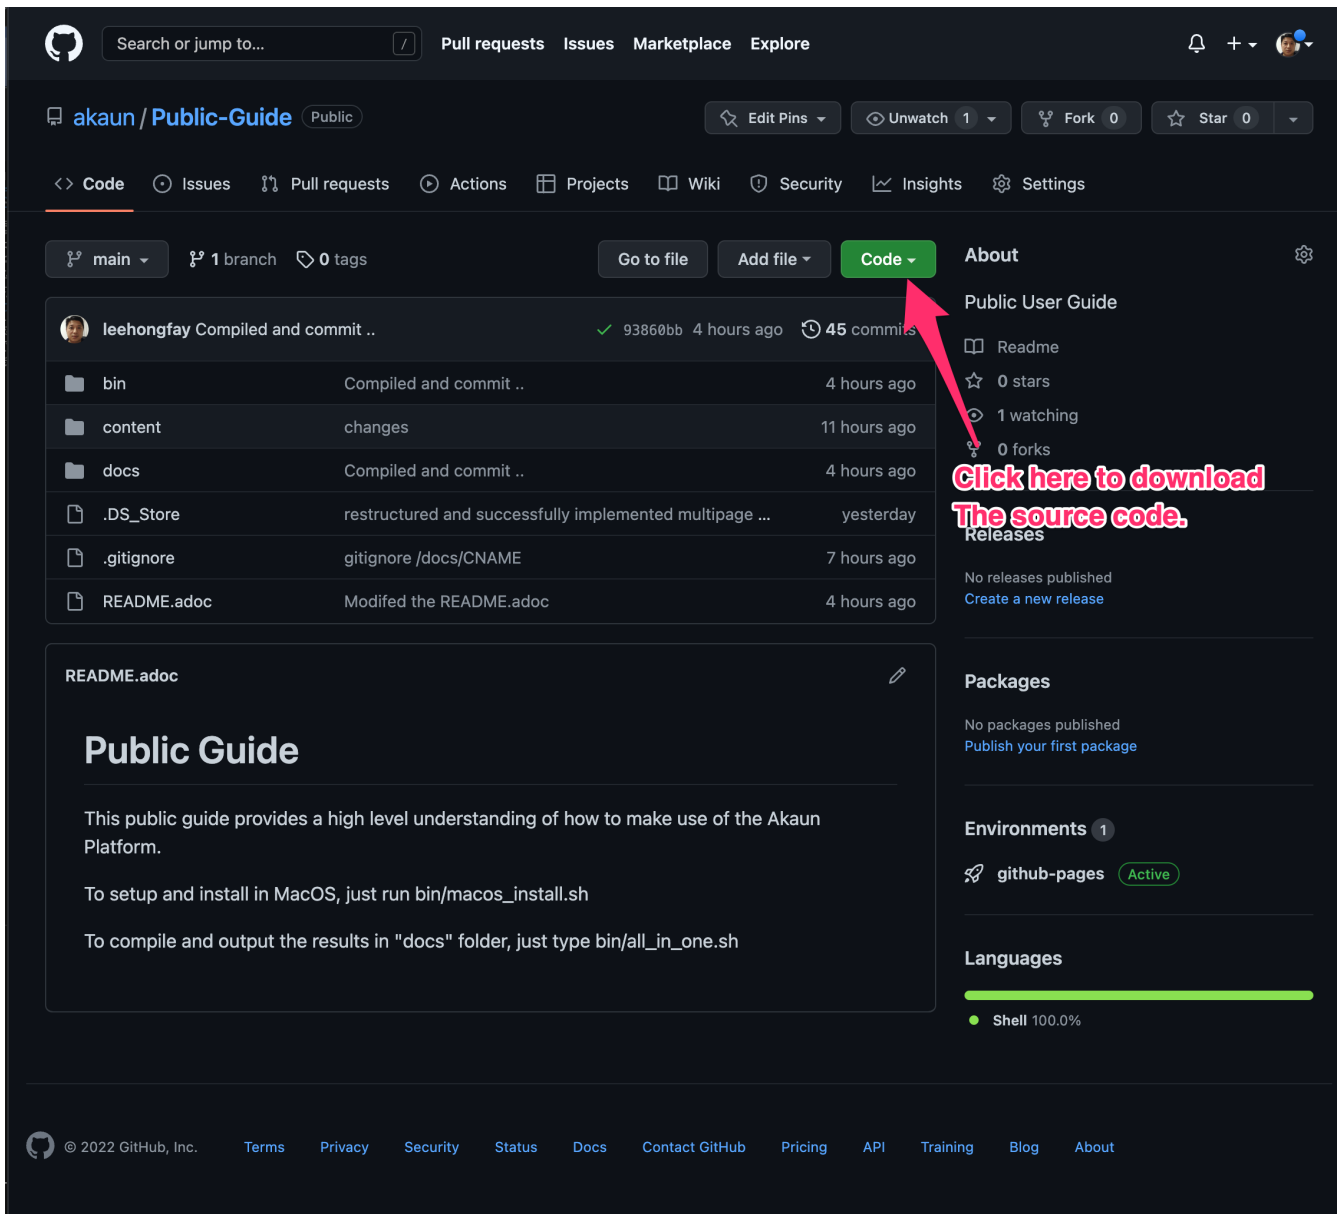

7.2.1. Github Repository

- Github User Account

In order to author this documentation, you will need to have a <https://github.com> account. As an employee of Wavelet.net or BigLedger.com , you will be using the <username>@wavelet.net to register for the github user.

You can request the HR department to grant you access to the hr@wavelet.net to grant you the access to Github Akaun organization (<https://github.com/akaun>).

- Downloading the Github Desktop Client by clicking on the button below:

Please visit <https://desktop.github.com/> to download the Github Desktop.

- Accessing the repository

After you have downloaded the github, please clone the <https://github.com/akaun/Public-Guide> to your local computer.

7.2.2. AsciiDoctor Toolchain

Depends on the operating systems you are using, please follow the instructions below accordingly:

Installing AsciiDoctor

- Linux
 - <https://docs.asciidoctor.org/asciidoctor/latest/install/linux-packaging/>
- Windows
 - <https://docs.asciidoctor.org/asciidoctor/latest/install/windows/>

- Mac
 - <https://asciidoctor.org/docs/install-asciidoctor-macos/>
 - <https://docs.asciidoctor.org/asciidoctor/latest/install/macos/>

Installing Epub3 Converter

Please click on the link below for detailed instructions:

<https://docs.asciidoctor.org/epub3-converter/latest/>

Installing PDF Converter

<https://asciidoctor.org/docs/asciidoctor-pdf/#install-the-published-gem>

Installing Multipage HTML Converter

<https://github.com/owenh000/asciidoctor-multipage>

7.2.3. Visual Studio Code

- Downloading Visual Studio Code

Please visit the following page to download. <https://code.visualstudio.com/download>

After you have installed the Visual Studio Code, please install the following extensions:

- AsciiDoc
- Github Pull Requests and Issues
- vscode-pdf

The next step is to open the folder where you cloned the <https://github.com/akaun/Public-Guide> repository using the Visual Studio Code

7.3. Understanding the Directory Structure

Folder Name	Description
bin	This folder contains shell scripts that you need to install and setup. You will also see a file called <code>publish.sh</code> , and this is the file that you would execute to compile the asciidoc into various file formats, and save them in the "docs" folder. You shouldn't be editing any files in this folder.
build	This is a temporary folder that gets deleted and re-created every time we "compile" the documentation. You shouldn't need to mess with files in this folder.

content	This is where you will be contributing by editing the files in this folder.
docs	You shouldn't need to edit any files in this folder. But you are welcome to open the files in this folder to check the "compiled output" of your changes , to ensure they are correct before pushing your code to the github, and request for your branch to be merged with the "main" branch in github.

7.4. Images

You may place the images anywhere in any sub-folders inside the "content/" folder, and reference to it in your asciidoc document using `assets/<image-file-name>`. The **bin/publish.sh** would copy all images in the "content" folder into the "content/assets" folder before the compilation and build of all asciidoctor formats.

Example:

```
image::assets/<image-file-name>[]
```

7.5. Committing Changes To The Repository

Before you make any changes, it is absolutely important that you **checkout** the local repository into a different branch, and the naming convention that we use would be:

YYYY-<email_address>

You may find the following resource useful:

- <https://code.visualstudio.com/docs/editor/versioncontrol#:~:text=You%20can%20create%20and%20checkout,tags%20in%20the%20current%20repository.>
- <https://www.youtube.com/watch?v=X9-iaXfKY5g>
- <https://www.youtube.com/watch?v=H5BLEPhqxe8>
- <https://www.jasongaylord.com/blog/2020/07/08/create-delete-branches-using-visual-studio-code>

Once you have made the changes you want, remember to run the command from the "Public-Guide" directory:

```
bin/publish.sh
```

The above shell script will clean up the "docs" and "build" folders, and then compile all the adoc files into the intermediate "build" folder and subsequently publish the final output into the "docs" folder.

To view the final output, you can open the "docs" folder and view the content in the folder by opening one of the following files:

- index.html (This is the multipage html output)
- blg_handbook.pub
- blg_handbook.pdf
- blg_handbook.html

Once you have completed your editing, the next step is to create a **pull request**. Refer to the following for more information:

- <https://docs.github.com/en/pull-requests/collaborating-with-pull-requests/getting-started/about-collaborative-development-models>
- <https://docs.github.com/en/pull-requests>
- <https://www.youtube.com/watch?v=oa1wXWeH1IQ>

Congratulations !!

7.6. List of workshops

- YYYY-MM-DD : First workshop by Vincent to Zain and Bagty
- YYYY-MM-DD

Glossary

Akaun Shell

The user interface that loads into a web browser, and showing users a list of applets.

Applet

An application that runs on the Akaun Shell.

Applet Store

The applet where users can discover other applets and install these other applets.

Environment

There are 3 environments, namely production, staging and development. Each of these environments lives in a different AWS account.

Platform Administrators

This refers to the BigLedger MIS Department.

System Administrator

This refers to the BigLedger MIS Department.

Root Database

This refers to the Platform main and global database.

Tenant

Every tenant is isolated from each other , it has its own independent database and other resources like files storage. Within a tenant, it is possible to create multiple companies, and they share the same database.

Tenant Admin

This refers to the OWNER or ADMIN of the Tenant.
